Directory of  
Forest Management Demonstration Areas  
in the South

Compiled by Larry Bishop, USDA Forest Service,  
in cooperation with the Southern State Foresters

General Report SA-GR 24  
September 1982

## FOREST MANAGEMENT DEMONSTRATIONS IN THE SOUTH

## PREFACE

Demonstration forestry has been around for a long time. Probably the first formal demonstration tour in the United States occurred in 1908 when Dr. Carl Schenck, a German forester, invited businessmen, lumbermen, politicians, and educators to come to a 3-day excursion through the Biltmore Estate and Pisgah Forest in North Carolina.

Today, with the increased emphasis on improving productivity on private, non-industrial forest lands, the demand for forest management demonstrations is greater than ever. No amount of forest management literature, of which there is an abundant supply, can substitute for "seeing the real thing." Southwide, many excellent forest management demonstrations exist, yet little is known about them except on a very limited and locally publicized basis. This is why this directory was compiled. Its purpose is to serve as a centralized information source for anyone interested in forest management demonstrations in the South.

In its present form, the directory may not be complete. Other good demonstrations may exist that are presently unknown to a great many people. However, the listing has been restricted to demonstrations which feature one or more forest management practices; therefore, purely "nature walk" type demonstrations are not included.

A Southwide Demonstration Committee, composed of numerous representatives from the forestry community, established the selection criteria for the demonstrations listed. Each State Forester then selected a state coordinator to be responsible for evaluating and recommending the candidate areas in their state. The selection criteria recommended by the Committee are as follows:

Objective: To demonstrate forest management to forest landowners, practicing foresters, forest land managers, or other knowledgeable laymen, to encourage good management of the South's forest lands.

Suggested Minimum Standards:

1. Either self-guided or conducted tours will be available at each demonstration area.
2. Demonstrations should have some type of sign(s) and handout material.
3. Demonstrations will be accessible to the intended audience.
4. A contact person will be identified for additional information.

Since each state coordinator is considered the final authority on determining which areas qualify in their state, the listing that follows includes all the areas recommended by the state coordinators. Please note that in some areas (particularly Alabama), visitations are by appointment only. If other areas exist in your state, that are not listed, and you believe would qualify for inclusion in this directory, please notify your State Forester.

Demonstrations can be a valuable tool. They excite the mind and can stimulate action. Hopefully, the demonstrations listed here will encourage private landowners, forestry students, and forest land managers to make the South's forests more productive.

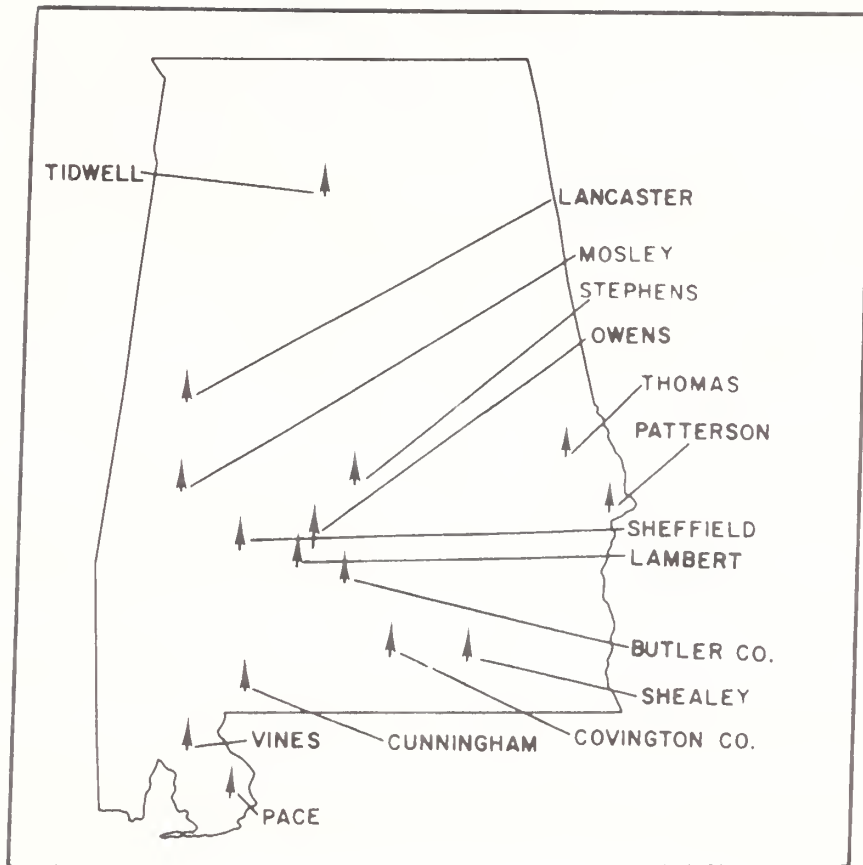

Larry Bishop  
Pine Silviculture Specialist

## TABLE OF CONTENTS

## ALABAMA

### BUTLER COUNTY FORESTRY DEMONSTRATION

This demonstration is located on the William Van Atkins property in Butler County. To get there, proceed west from Greenville on State Highway 10 for approximately 14 miles and then turn south on County Road 7 for 1-1/2 miles. This is a privately owned tract, and tours of the demonstration are by appointment only.

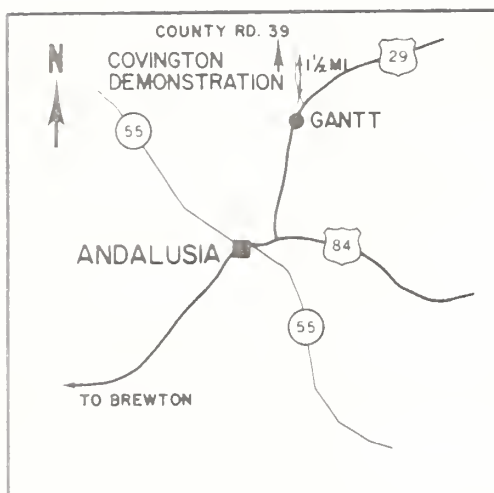

Facilities: organized tours with guide personnel, paved roads.

Demonstrations: loblolly, slash, and short-leaf pine management; clearcutting with machine planting; timber stand improvement (release); site preparation (shearing and windrowing); prescribed burning; control of kudzu and

understory hardwoods; sawtimber and pulpwood production; and selective thinning.

For more information contact: Ronnie Williams, County Agent, P. O. Box 338, Greenville, Alabama 36037, phone (205) 382-5111.

COVINGTON COUNTY FORESTRY DEMONSTRATION

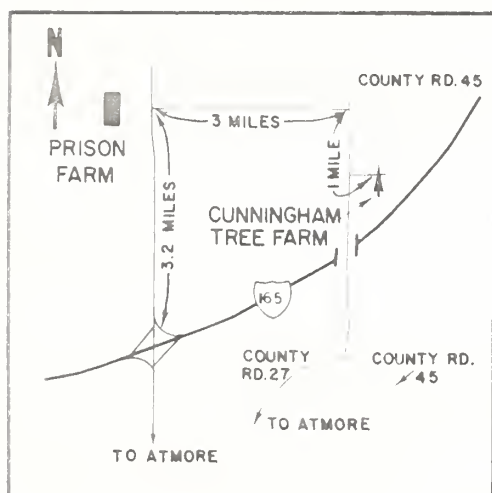

This demonstration is located on the Joe Rawls tract in Covington County, 9 miles north of Andalusia, off U. S Highway 29. It is a privately owned tract, and tours are by appointment only.

Facilities: organized tour with guide personnel.

Demonstrations: slash pine management; clear-cutting with hand planting; direct seeding; timber stand improvement (release); prescribed burning; vegetative control using Velpar grid-balls; sawtimber and pulpwood production; leave-tree thinning.

For more information contact: Albert Hartage, County Ranger, County Office Building, Andalusia, Alabama 36420, phone (205) 222-4041.

K. E. CUNNINGHAM TREE FARM

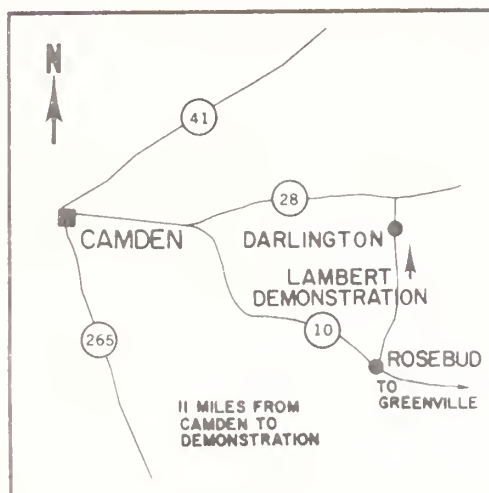

The Cunningham tract is located in Escambia County, 10 miles north of Atmore near the intersection of County Road 45 and I-65. This is a privately owned tract, and tours of the demonstrations are by appointment only.

Facilities: organized tours with guide personnel, paved road.

Demonstrations: slash pine management, clearcutting with hand planting; timber stand improvement (release); site preparation (fertilization); prescribed burning; sawtimber and pulpwood production; row and selection thinning; range management (fertilization, fencing, and thinning); cultural resource management; and wildlife habitat management including food plot construction and maintenance, and featuring quail and rabbits.

For more information contact: Robert M. Franklin, County Agent, P. O. Box 768, Brewton, Alabama 36426, phone (205) 867-6038.

### LAMBERT FORESTRY DEMONSTRATION

The Lambert Tract is located in Wilcox County, 11 miles east of Camden, south of Darlington, and north of Rosebud. This is a privately owned tract, and tours of the demonstrations are by appointment only.

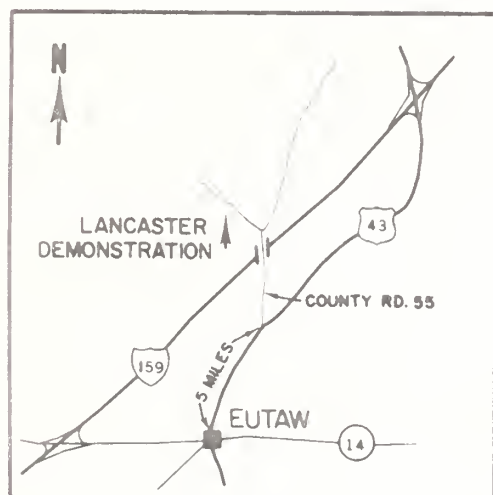

Facilities: organized tours with guide personnel, paved road.

Demonstrations: loblolly pine management; upland hardwood management; natural regeneration by block clearcut; seed tree method; timber stand improvement (release); prescribed burning; fire-line construction and maintenance; control of understory hardwoods; sawtimber, pulpwood, poles and piling production; recreation and timber coordination through TSI modifications; and

wildlife habitat management featuring whitetail deer and turkey.

For more information contact: William J. Hardy, County Agent, Court House Annex, Camden, Alabama 36726.

### LANCASTER FORESTRY DEMONSTRATION

This demonstration is located on the James Lancaster tract in Greene County. To get there, proceed north from Eutaw for 5 miles on U. S. 43, then turn left on County Road 55 for 2 miles; turn left on the first road after passing under I-59 and proceed for 1-1/2 miles. This is a privately owned tract, and tours of the demonstration area are by appointment only.

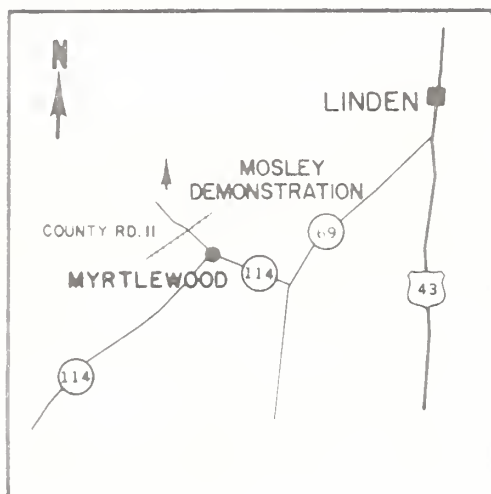

Facilities: signs, organized tours with guide personnel, paved road.

Demonstrations: loblolly and shortleaf pine management; clearcutting with machine planting; seed tree method; site preparation (windrowing); control of understory hardwoods; sawtimber, pulpwood, and fuelwood production; wildlife habitat

management, including food plot construction, and featuring whitetail deer and turkey.

For more information contact: Jerry B. Clark, County Agent, P. O. Box 228, Eutaw, Alabama 35462, phone (205) 372-3401.

W. KELLY MOSLEY DEMONSTRATION

The Mosley Demonstration is located in Marengo County, 2 miles west of Myrtlewood on County Road #11. This is privately owned land, and tours of the demonstration are by appointment only.

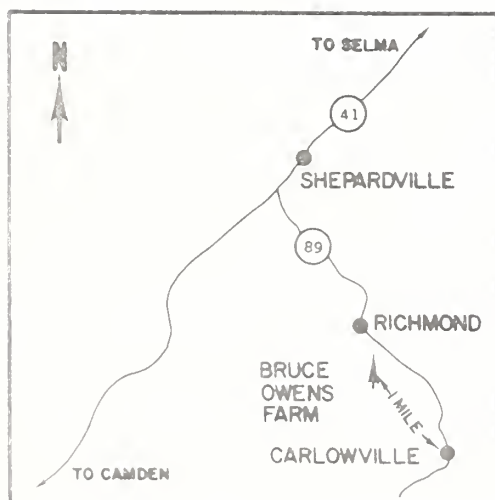

Facilities: signs, organized tours with guide personnel, paved road.

Demonstrations: loblolly pine management; bottomland hardwood management; clearcutting with hand planting; natural regeneration by block clearcutting; shelterwood method; timber stand improvement (release); precommercial thinning; prescribed burning; site preparation (shearing, windrowing, and fertilization); fireline construction and maintenance; vegetative control (honeysuckle and

grapevines); sawtimber, pulpwood, and fuelwood production; row and selective thinning; erosion control; logging road layout and design; special feature area management; special feature plants management; cultural resource management; recreation and timber coordination through harvesting modifications; trail construction and maintenance; wildlife habitat management, including food plot construction and maintenance, and featuring whitetail deer, turkey, quail, grey squirrels, waterfowl, and songbirds.

For more information contact: Charles E. Smith, County Agent, County Office Bldg., Linden, Alabama 36748, phone (205) 295-5959; or Larkin Wade, Extension Forester, Alabama Cooperative Service, Auburn University, University, Alabama 36849, phone (205) 826-5330.

BRUCE OWENS FARM

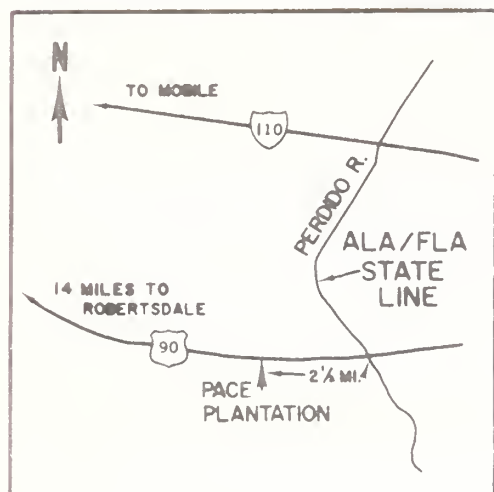

The Owens farm is located in Dallas County on State Highway 89, between Carlowville and Richmond. This is a privately owned tract, and tours of the demonstrations are by appointment only.

Facilities: organized tours with guide personnel, gravel road.

Demonstrations: loblolly and slash pine management; bottomland hardwood management; clearcutting with hand planting; timber stand improvement (release); site preparation (windrowing); prescribed burning; control of understory hardwoods; sawtimber, pulpwood, and fuelwood production; wildlife habitat management, including food plot construction and maintenance, and featuring white-tail deer, turkey, quail, and grey squirrel.

For more information contact: Frank Roth, Extension Forester, P. O. Box 1096, Selma, Alabama 36701, phone (205) 875-3232.

ROBERT A. PACE PLANTATION

The Pace tract is located in Baldwin County on U. S. Highway 90, about 2.5 miles east of the Alabama-Florida line. This is a privately owned tract, and tours of the demonstrations are by appointment only.

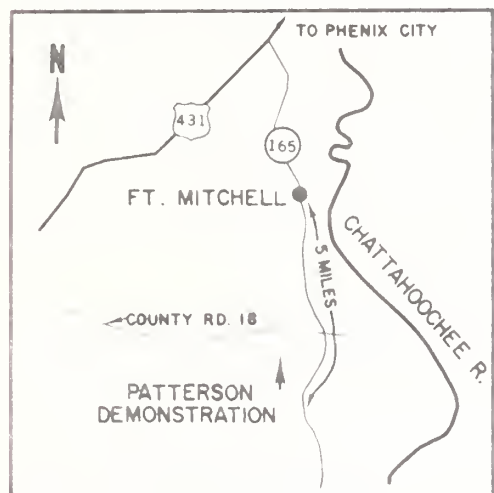

Facilities: restrooms, drinking water, organized tours with guide personnel, gravel roads.

Demonstrations: slash pine management; clearcutting with machine and hand planting; seed tree method; site preparation (bedding and fertilization); prescribed burning; control of understory hardwoods; sawtimber, pulpwood, poles and piling production; forest taxation and Forestry Incentives Program; thinning; special feature area management; recreation and timber coordination through T.S.I.;

and wildlife habitat management through site preparation modification, prescribed burning, food plot construction and maintenance, and featuring whitetail deer, quail, waterfowl, and ospreys.

For more information contact: Robert A. Pace, 900 South E Street, Apt. 246, Pensacola, Florida 32501, phone (904) 433-0666 or 434-0758; or Ed Tunnell, County Agent, P. O. Box 389, Bay Minnette, Alabama 36507, phone (205) 937-7176.

PATTERSON PROPERTY-WHOLE WOODLANDS MANAGEMENT DEMONSTRATION

The Patterson tract is located in Russell County, 5 miles south of Ft. Mitchell on State Highway 165. It is a privately owned tract, and tours of the demonstrations are by appointment only.

Facilities: drinking water, brochures, self-guided tour, organized tour with guide personnel, slide/tape program, and gravel road.

Demonstrations: loblolly pine management, Virginia pine (Christmas trees) management; upland and bottomland hardwood management; clearcutting with hand and machine planting; seed tree method; timber stand improvement (release); site preparation (chopping, shearing, and windrowing); prescribed burning; fireline construction and maintenance; control of understory hardwoods; insect

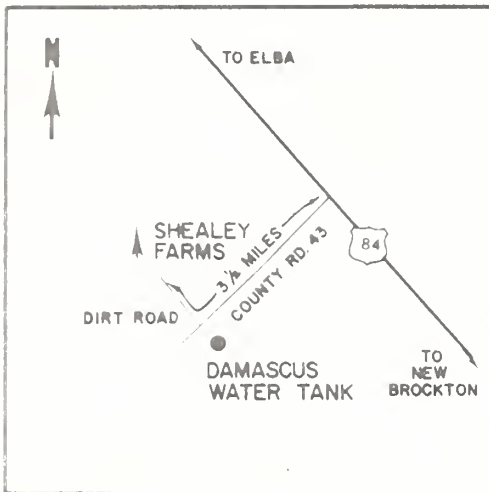

control (southern pine beetle); disease control (littleleaf disease); sawtimber, pulpwood, fuelwood, and Christmas tree production; forest economics, taxation, Forestry Incentives Program; erosion control, logging road layout and design; special feature area management; special feature plants management; cultural resource management; recreation and timber coordination through harvesting and site preparation modifications; wildlife habitat management through site preparation and TSI modification, prescribed burning, food plot construction and maintenance, and featuring whitetail deer, turkey, quail, grey squirrel, waterfowl, and songbirds.

## ALABAMA, Continued

For more information contact: Donald M. Bice, County Agent, P. O. Box 1128, Phenix City, Alabama 36867, phone (205) 298-6845; or John Rudd, P. O. Box 147, Ft. Mitchell, Alabama 36856, phone (205) 855-4680.

### SHEALEY FARMS

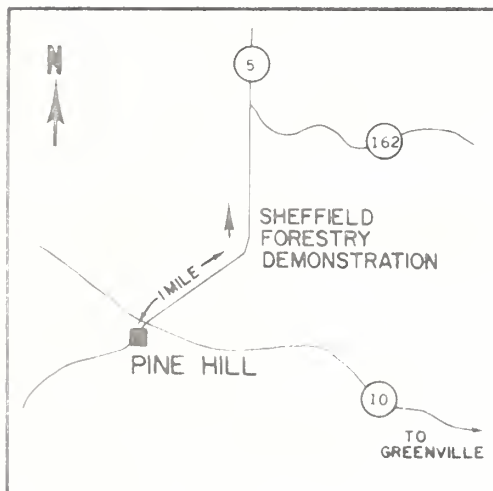

The Shealey Tract is located in Coffee County, 5 miles west of New Brockton on U. S. 84. This is a privately owned tract, and tours of the demonstration are by appointment only.

Facilities: organized tours with guide personnel, gravel roads.

Demonstrations: loblolly and slash pine management; upland and bottomland hardwood management; clearcutting with machine planting; direct seeding; site preparation (windrowing); insect control (Ips bark beetles).

For more information contact: Tom Cassaday, County Agent, P. O. Box 489, New Brockton, Alabama 36330, phone (205) 894-5596.

### SHEFFIELD FORESTRY DEMONSTRATION

The Sheffield tract is located in Wilcox County, 1 mile north of Pine Hill on State Highway 5. This is a privately owned tract, and tours of the demonstration are by appointment only.

Facilities: signs, organized tours with guide personnel, paved and gravel roads.

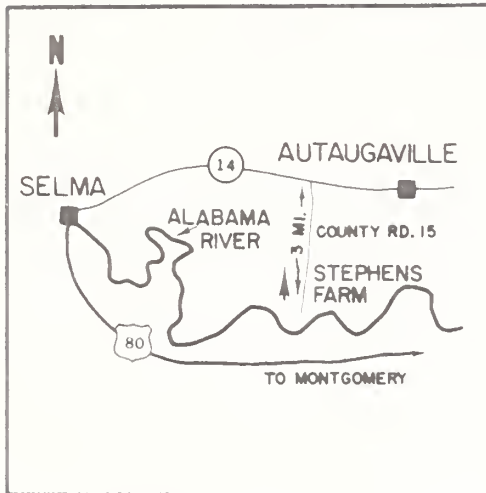

Demonstrations: loblolly pine management; clear-cutting with machine and hand planting; natural regeneration by seed-in-place method; direct seeding; timber stand improvement (release); site preparation (shearing and windrowing); prescribed burning; control of understory hardwoods; disease control (fusiform rust); sawtimber and pulpwood production; forest finance (Forestry Incentives Program); selection thinning; erosion control;

special feature plants management; recreation and timber coordination through harvesting and site preparation modifications; and wildlife habitat management through prescribed burning, and featuring whitetail deer, turkey, and songbirds.

For more information contact: Randy Loyd, Area Forester, P. O. Box 686, Monroeville, Alabama 36461, phone (205) 575-3477.

## ALABAMA, Continued

### CHESTER O. STEVENS FARM

The Stevens Farm is located in Autauga County off State Highway 14 on County Road 15, between Selma and Autaugaville. It is a privately owned tract, and tours of the demonstrations are by appointment only.

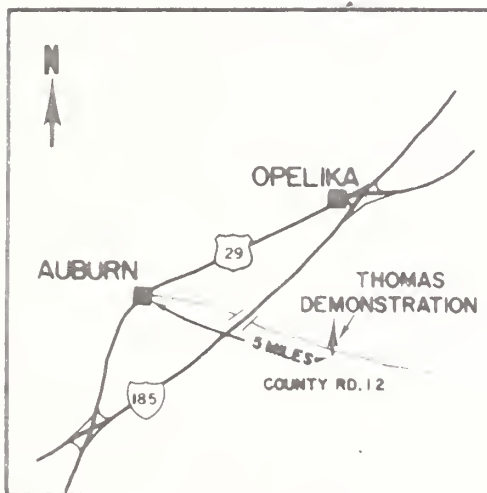

Facilities: visitor information center, drinking water, organized tours with guide personnel, paved road.

Demonstrations: loblolly, slash, and Virginia (Christmas trees) pine management; bottomland hardwood management; clearcutting with machine and hand planting; natural regeneration by block clearcutting; seed tree method; shelterwood method; timber stand improvement (release); site preparation (chopping) fireline construction and maintenance;

control of understory hardwoods; insect control (Nantucket pine tip moth on Christmas trees); sawtimber, pulpwood, poles and piling, fuelwood, and Christmas tree production; selective thinning; erosion control; logging road layout and design; special feature area management; special feature plant management; cultural resource management; recreation and timber coordination through harvesting modifications; trail construction and maintenance; and wildlife habitat management with food plot construction and maintenance, and featuring whitetail deer, turkey, quail, grey squirrel, waterfowl, and songbirds.

For more information contact: Frank Roth, Extension Forester, P. O. Drawer 1096, Selma, Alabama 36701, phone (205) 875-3232; or Max F. Scott, P. O. Box 40, Prattville, Alabama 36067, phone (205) 365-2243.

### MARY OLIVE THOMAS DEMONSTRATION

The Thomas tract is located in Lee County, 5 miles east of Auburn on County Road 12. This is a privately owned tract, and tours of the demonstration areas are by appointment only.

Facilities: organized tours with guide personnel; paved road.

Demonstrations: loblolly pine management; bottomland hardwood management; clearcutting with hand planting; direct seeding; site preparation (chopping and windrowing); prescribed burning; fireline construction and maintenance; disease control (fusiform rust); sawtimber and pulpwood production; thinning; erosion control; trail construction and maintenance; wildlife habitat management through TSI modifications and prescribed burning, and featuring whitetail

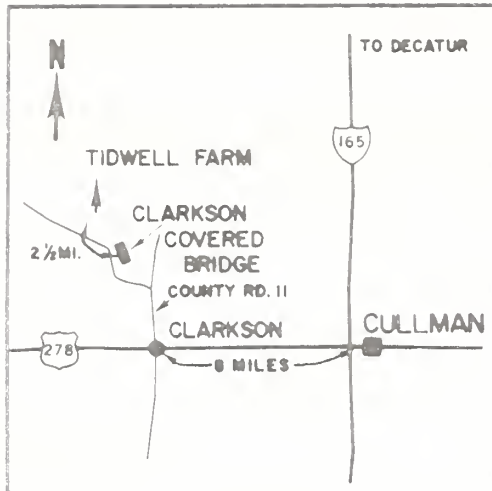

deer, turkey, quail, grey squirrel, and songbirds.

For more information contact: Jeffrey Clary, Extension Agent, Room 106, Federal Bldg., Opelika, Alabama 36801, phone (205) 749-3353; or Larkin Wade, Extension

## ALABAMA, Continued

Forester, Alabama Cooperative Extension Service, Auburn University, Alabama 36849, phone (205) 826-5330.

### NOEL TIDWELL FARM

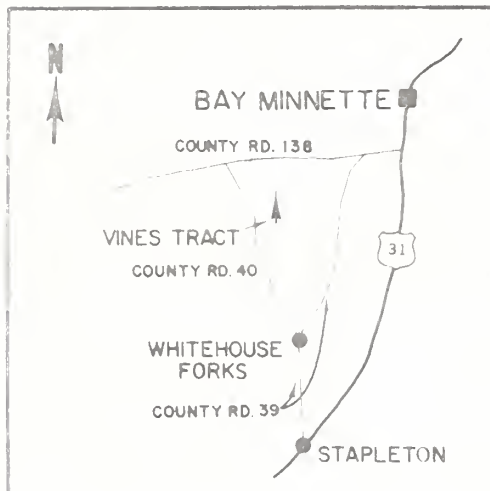

The Tidwell Farm is located in Cullman County. To get there, take U. S. 278 west from Cullman for 8 miles, then turn right on County Road 11 and proceed for 1/2 mile, then turn left on paved road to the Clarkson Covered Bridge; proceed for 2-1/2 miles, then turn right on dirt road and proceed for 1 mile to the Tidwell Farm. This is a privately owned tract, and tours are by appointment only.

Facilities: organized tours with guide personnel, gravel road.

Demonstrations: loblolly and shortleaf pine management; upland hardwood management; natural regeneration by block clearcutting and seed-in-place; prescribed burning; timber stand improvement (release); control of understory hardwoods; insect control (black turpentine beetles, southern pine beetles, and Ips bark beetles); disease control (annosus root rot and fusiform rust); sawtimber and pulpwood production; thinning; range management (thinning); wildlife habitat management featuring quail and grey squirrels.

For more information contact: Gregg Hodges, County Agent, Room 206, Courthouse, Cullman, Alabama 35055, phone (205) 739-3530, extension 211.

### MACK VINES PROPERTY

The Mack Vines tract is located in Baldwin County, 6 miles southwest of Bay Minette on County Road 40 and 5 miles northwest of Stapleton. This is a privately owned tract, and tours of the demonstration area are by appointment only.

Facilities: organized tours with guide personnel.

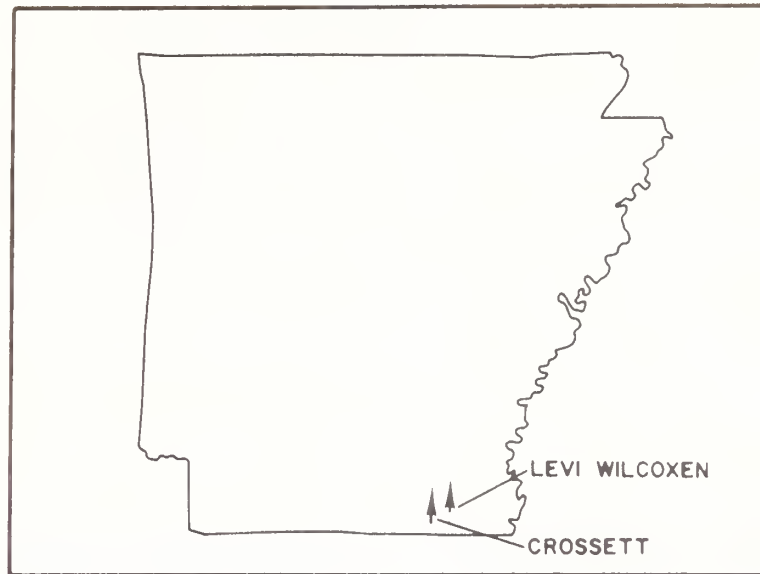

Demonstrations: loblolly and slash pine management; bottomland hardwood management; clearcutting with hand planting; natural regeneration by seed-in-place method, shelterwood method, and diameter-limit cutting; prescribed burning; vegetative control of honeysuckle, grapevine, and understory hardwoods; insect control (southern pine beetles); sawtimber, pulpwood, poles and pilings, fuelwood, and Christmas tree production; forest taxation and Forestry

Incentives Program; erosion control; logging road layout and design; wildlife habitat management featuring turkeys.

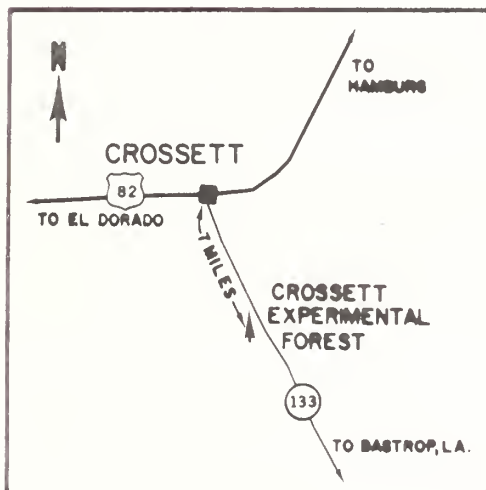

For more information contact: Ed Tunnell, County Agent, P. O. Box 389, Bay Minette, Alabama 36507, phone (205) 937-7176; or W. Mack Vines, Rt. 1, Box 148, Bay Minette, Alabama 36507, phone (205) 937-5719.

## ARKANSAS

### CROSSETT EXPERIMENTAL FOREST

The Crossett Experimental Forest is located in Ashley County, 7 miles south of Crossett on Arkansas Highway 133. It is administered by the USDA Forest Service, and is open to the public.

Facilities: restrooms, drinking water, information leaflets; signs; interpretive displays; organized tours with guide personnel; classroom facilities; slide/tape program; gravel roads.

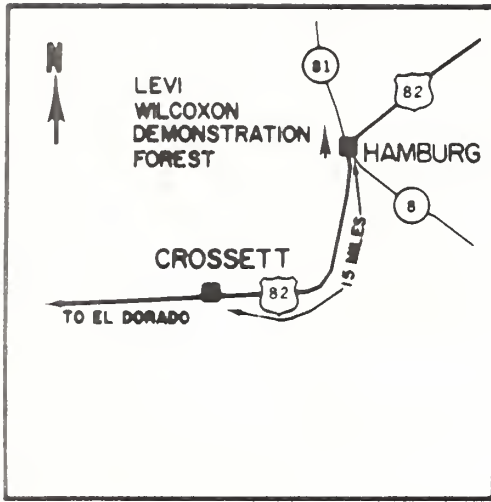

Demonstrations: loblolly pine management, natural regeneration by block and strip clearcut, the seed tree method, the shelterwood method, diameter-limit cutting, and the selection method; timber stand improvement by release, precommercial thinning, and pruning; control of understory hardwoods; seed orchard, superior tree, and genetic outplant-

ings; sawtimber and pulpwood production; forest economics.

For more information contact: Dr. James Baker, USDA Forest Service, Box 3516, Monticello, Arkansas 71655, phone (501) 367-3464.

## ARKANSAS, Continued

### LEVI WILCOXON DEMONSTRATION FOREST

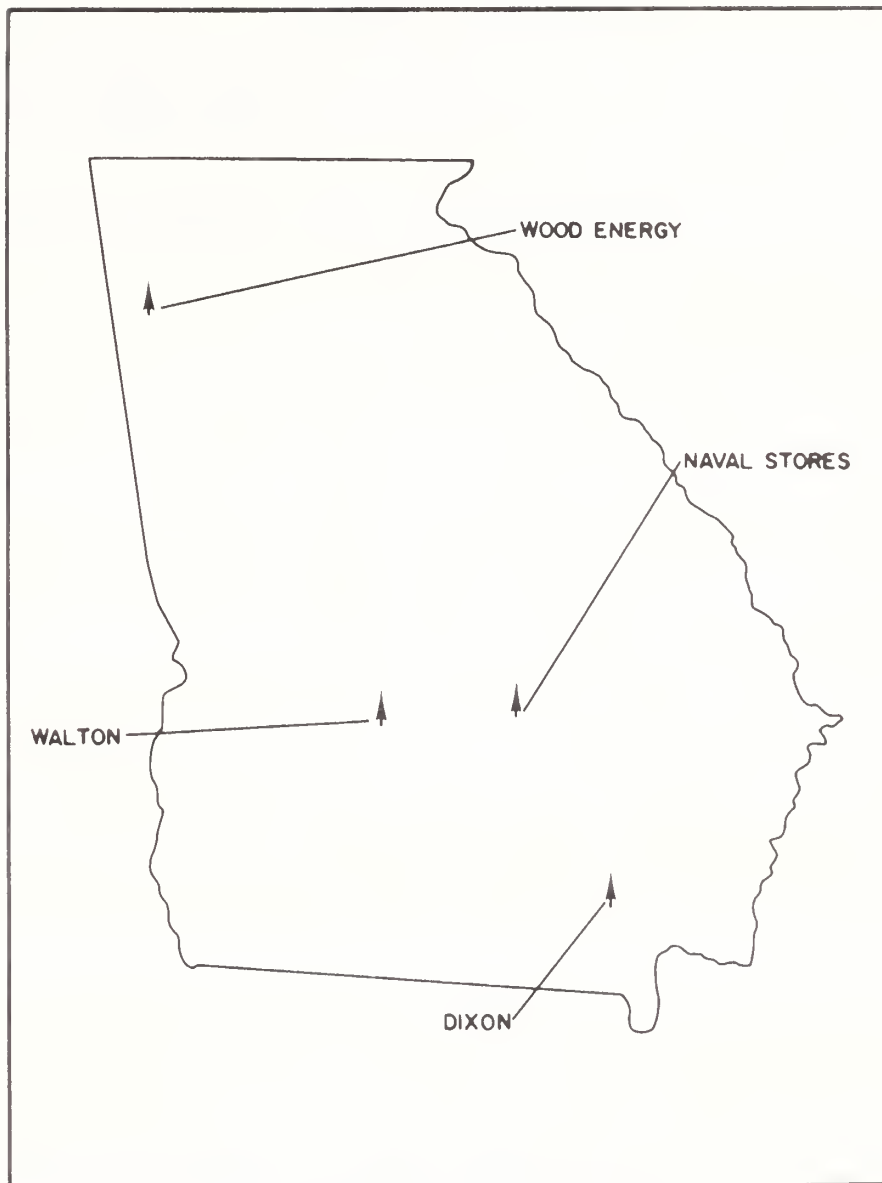

The Levi Wilcoxon Demonstration Forest is located in Ashley County near the intersection of U. S. Highway 82 and Arkansas Highway 81, approximately 15 miles east of Crossett. Owned and administered by the Georgia-Pacific Corporation, it features a virgin stand of loblolly pine and several forest management practices of interest to non-industrial landowners, forestry school students, foresters, and natural resource managers. It is open to the public.

Facilities: brochure, signs, self-guided tour.

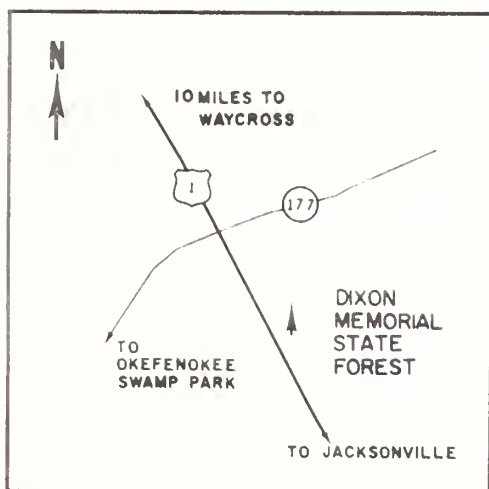

Demonstrations: loblolly pine management; pre-commercial thinning; prescribed burning; outplantings of superior pine seedlings; virgin timber stand.

For more information contact: Georgia-Pacific Corporation, P. O. Box 520, Crossett, Arkansas 71635; phone (501) 567-8075.

# GEORGIA

## DIXON MEMORIAL STATE FOREST

The Dixon Memorial State Forest is located in Ware County approximately 10 miles south of Waycross on U. S. 1. It is administered by the Georgia Forestry Commission, and is open to the public.

Facilities: restrooms, drinking water, brochure, signs, interpretive exhibits, organized tours with guide personnel, classroom facilities, movies, paved and gravel roads.

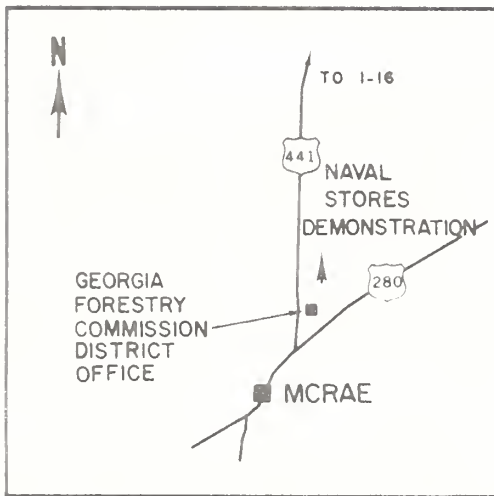

Demonstrations: loblolly, slash, and longleaf pine management; clearcutting with machine and hand planting; natural regeneration with block clearcutting; seed tree method; site preparation (chopping, disking, and bedding); prescribed burning; fireline construction and maintenance; insect control (black turpentine beetle); seed

orchard, superior tree, genetic outplantings; sawtimber, pulpwood, poles and pilings,

and naval stores production; row and leave-tree thinning; special feature area management; cultural resource management; wildlife habitat management including food plot construction and maintenance, and featuring whitetail deer, turkey, quail, grey squirrel, waterfowl, and songbirds.

For more information contact: Billy Barker, Forest Supervisor, Route #6, P. O. 169, Waycross, Georgia 31501, phone (912) 283-5464.

#### NAVAL STORES DEMONSTRATION

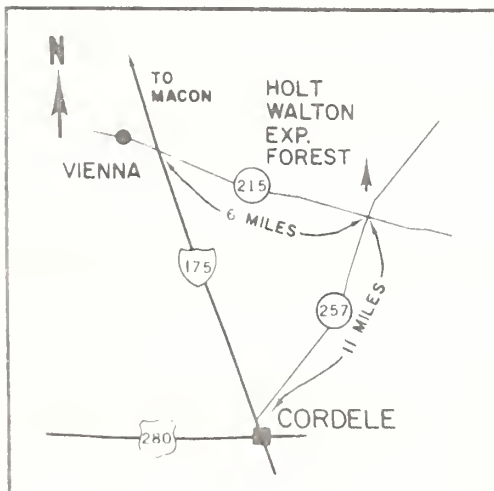

This demonstration is located in Wheeler County just north of McRae at the Georgia Forestry Commission District Office on U. S. 441. It is administered by the Georgia Forestry Commission, and open to the public.

Facilities: restrooms, drinking water, brochures, organized tours with guide personnel, classroom facilities, paved and gravel roads.

Demonstration: extraction of gum naval stores from slash and longleaf pine.

For more information contact: Grady Williams, Naval Stores Supervisor, Rt. 1, Box 46, Helena, Georgia 31037, phone (912) 868-5649.

#### HOLT WALTON EXPERIMENTAL FOREST

The Walton Experimental Forest is located in Dooly County, 8 miles south of Vienna on State Highway 215. It is a privately owned tract on which the USDA Forest Service has conducted silvicultural research for many years under a cooperative agreement with the Walton family. Although the area is open to the public, please make an appointment before visiting the demonstrations.

Facilities: restrooms, drinking water, brochures, signs, organized tours with guide personnel, classroom facilities, slide/tape program, paved and gravel roads.

Demonstrations: loblolly, slash, longleaf, and shortleaf pine management; clearcutting with machine and hand planting; direct seeding; seed

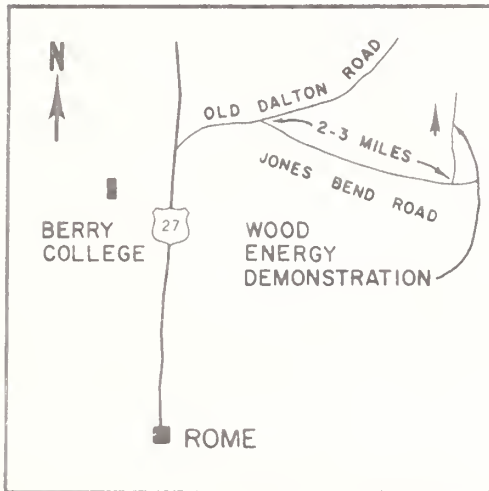

tree method; precommercial thinning; site preparation (chopping, shearing, windrowing, and bedding); prescribed burning, fireline construction and maintenance; disease control (annosus root rot); insect control (black turpentine beetles in naval stores production); genetic outplantings; sawtimber, pulpwood, poles and piling, and

## GEORGIA, Continued

naval stores production; row and leave-tree thinning; spacing study; interplanting problems; rotation study.

For more information contact: Earle P. Jones, USDA Forest Service, Southeastern Forest Experiment Station, Dry Branch, Georgia 31020, phone (912) 744-0261.

### WOOD ENERGY DEMONSTRATION

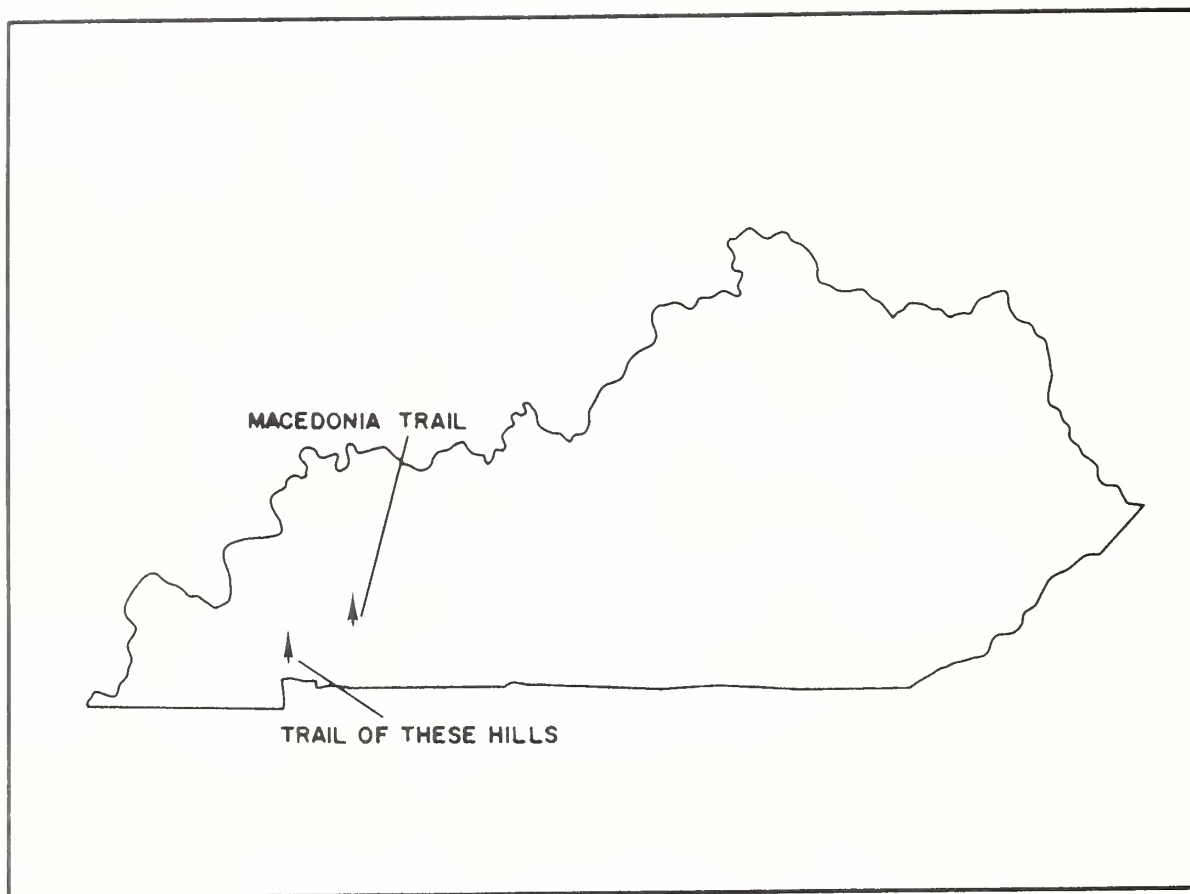

This demonstration is located in Floyd County approximately 4 miles north of Rome off U. S. 27 and the Old Dalton Road. The property is owned by Berry College (a private institution), and is administered cooperatively with the Georgia Forestry Commission.

Facilities: brochures, signs, organized tours with guide personnel, and gravel road.

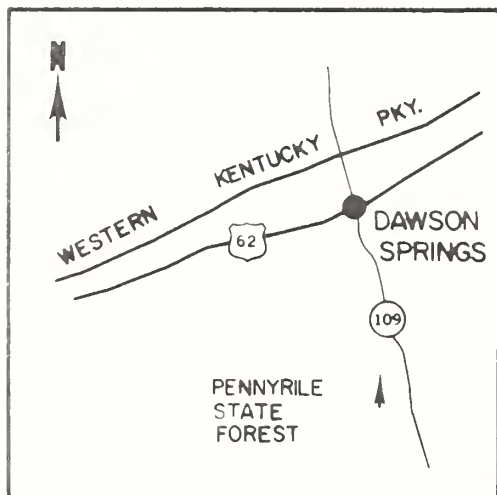

Demonstrations: clearcutting with machine planting; shelterwood method; timber stand improvement (release); whole tree chipping; sawtimber, pulpwood, and fuelwood (energy wood) production; logging road layout and design.

For more information contact: David McClain, Forester, Georgia Forestry Commission, P. O. Box 2, Mount Berry, Georgia 30149, phone (404) 295-6021.

## KENTUCKY

### MACEDONIA TRAIL

The Macedonia Trail is located in Pennyryle State Forest in Christian County, just south of Dawson Springs on State Highway 109. It is administered by the Kentucky Division of Forestry, and open to the public.

Facilities: signs, self-guided tour.

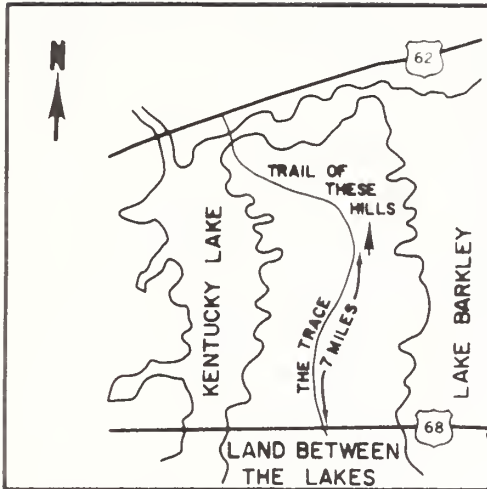

Demonstrations: loblolly and white pine management; upland hardwood management; single-tree selection management; timber stand improvement (release); precommercial thinning; vegetative control (honey-suckle and grapevines); sawtimber production; leave-tree thinning; erosion control; special feature area management; special feature plants management; cultural resource management; wildlife habitat management through TSI and harvesting modifications,

and featuring whitetail deer, turkey, grey squirrel, and waterfowl.

For more information, contact: Richard Hawe, Kentucky Division of Forestry, Box 468, Madisonville, Kentucky 42431, phone (502) 821-7434.

## KENTUCKY, Continued

### TRAIL OF THESE HILLS

Trail of These Hills is located in Trigg County in the Land Between the Lakes, approximately 9 miles north of the intersection of U. S. 68 and The Trace. It is administered by the Tennessee Valley Authority, and open to the public.

Facilities: restrooms, signs, self-guided tour.

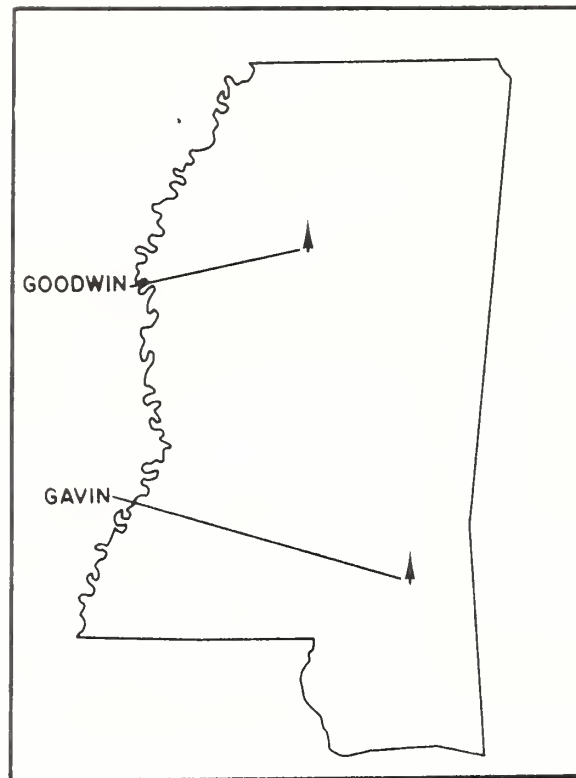

Demonstrations: white, Virginia, and shortleaf pine management; natural regeneration block clearcutting; shelterwood cutting; single-tree and group selection management; timber stand improvement (release); sawtimber production; special feature area management; special feature plant management; cultural resource management; wildlife habitat management through TSI and harvesting modifications, food plot construction and maintenance, and featuring

whitetail deer, fallow deer, turkey, quail, grey squirrel, waterfowl, and songbirds.

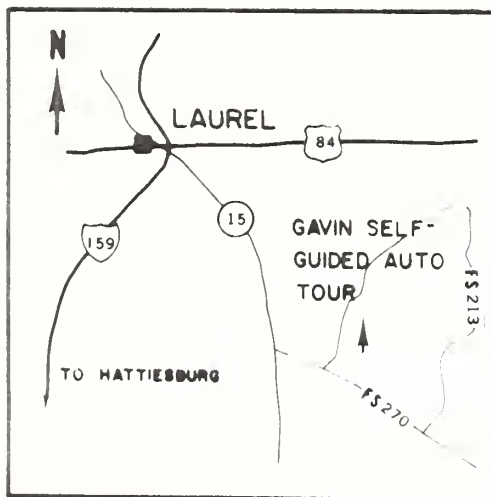

For more information contact: Robert E. Drexler, Tennessee Valley Authority, Golden Pond, Kentucky 42231, phone (502) 924-5602.

## MISSISSIPPI

### GAVIN SELF-GUIDED AUTO TOUR

The Gavin Self-Guided Auto Tour is located in Jones County on the DeSoto National Forest, 13 miles south of Laurel off State Highway 15. The tour starts at the intersection of Forest Service roads 270 and 213 (about 1/2 mile east of Highway 15). It is administered by the USDA Forest, and is open to the public.

Facilities: signs, self-guided tour, interpretive exhibits/displays, organized tours with guide personnel (on request), gravel roads.

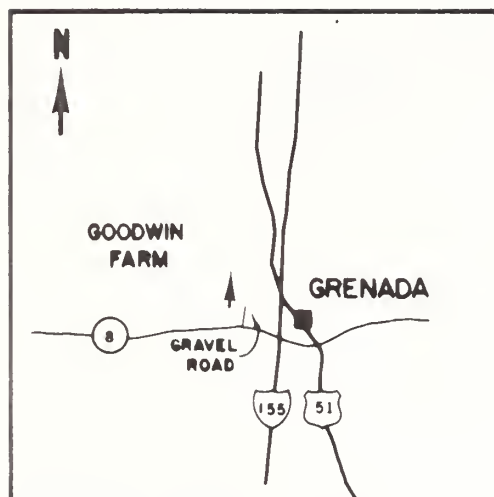

Demonstrations: slash and longleaf pine management; clearcutting with machine and hand planting; seed tree method; results of non-management; precommercial thinning; site preparation (chopping, shearing and windrowing); prescribed burning; disease control (fusiform rust); superior trees; sawtimber, pulpwood, poles and piling production; leave-tree thinning; erosion control; range management (fencing, site preparation, and reforestation); aesthetics (stand shaping); wildlife habitat management including food plot construction and maintenance, and featuring whitetail deer, turkey, quail, and red-cockaded woodpeckers.

For more information contact: Bobby Brady, District Ranger, USDA Forest Service, P. O. Box 426, Laurel, Mississippi 39440, phone (601) 428-0594.

## MISSISSIPPI, Continued

### HOUSTON GOODWIN FARM

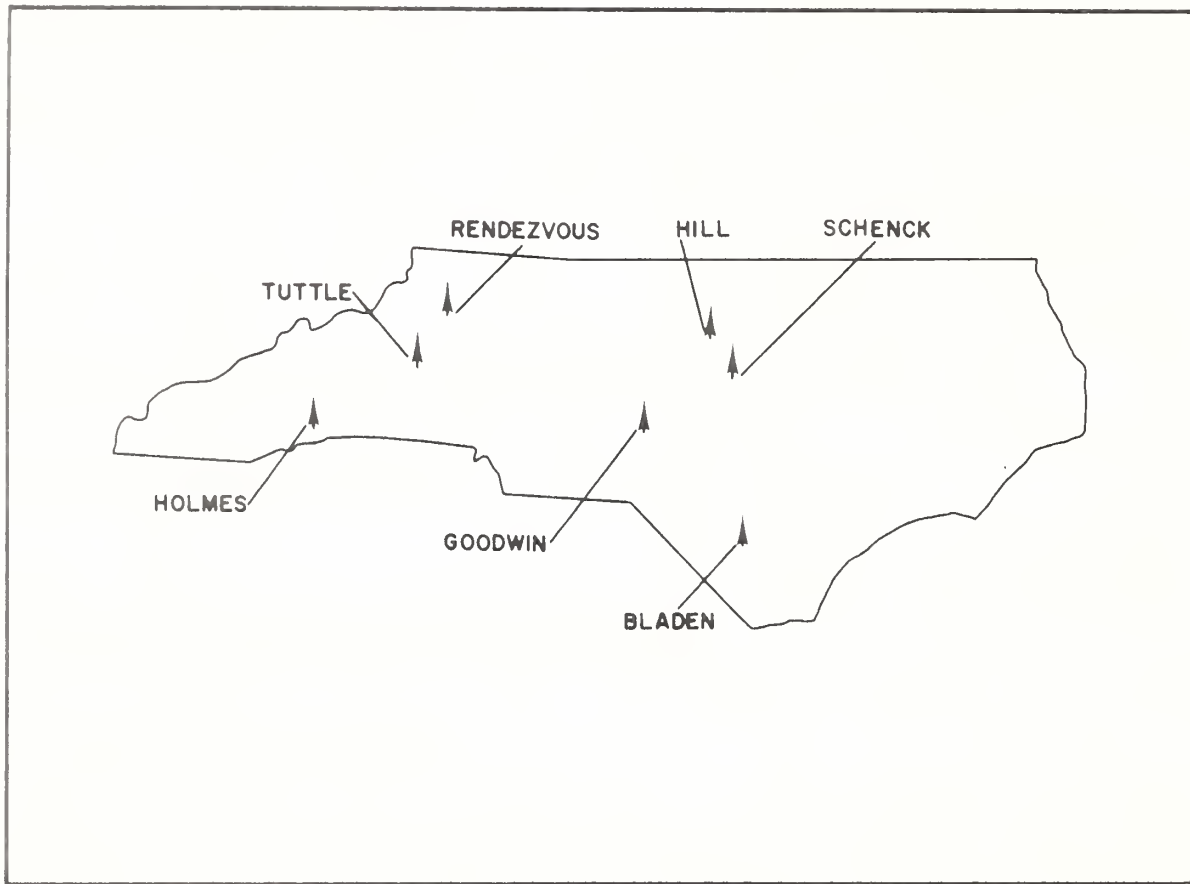

The Houston Goodwin farm is located in Granada County, 3.6 miles west of Granada off State Highway 8 West. To get there, take the first gravel road on the right after passing the I-55 overpass. The demonstration is about .1 mile farther on the left. This is a privately owned tract, open to the interested public.

Facilities: brochures, sign, self-guided tour, gravel road.

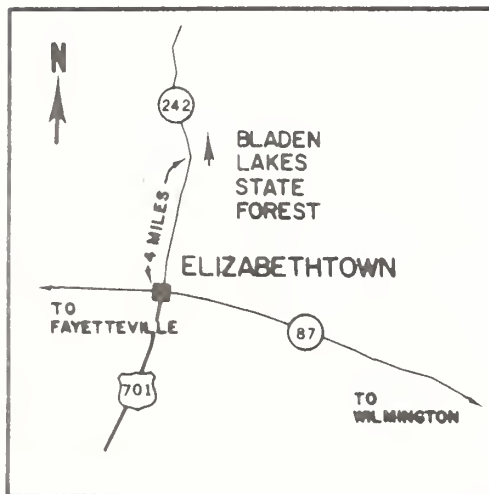

Demonstrations: loblolly pine management; saw-timber and pulpwood production; forest economics; row and strip thinning; erosion control.

For more information contact: Tim Traugott, Project Forester, 1241 Mound St, Grenada, Mississippi 28901, phone (601) 226-4251.

## NORTH CAROLINA

### BLADEN LAKES STATE FOREST

Bladen Lakes State Forest is located in Bladen County, 4 miles north of Elizabethtown on North Carolina Highway 242. It is administered by the State of North Carolina, and is open to the public.

Facilities: visitor information center, restrooms, drinking water, brochures, signs, self-guided tour, interpretive exhibits, organized tours with guide personnel, slide/tape program, gravel roads.

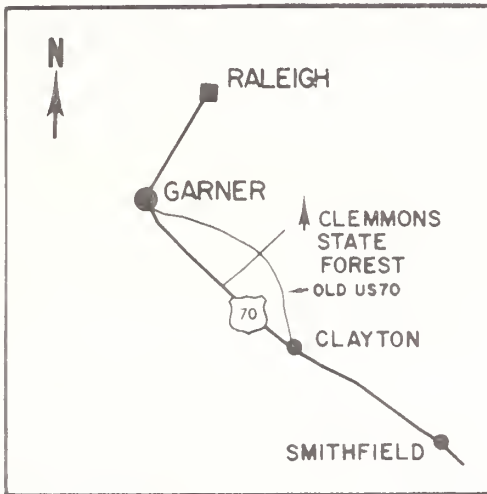

Demonstrations: loblolly, slash, and longleaf pine management; bottomland hardwood management; clearcutting followed by machine and hand planting; direct seeding; shelterwood method; timber stand improvement (release and precommercial thinning); site preparation (chopping, windrowing, disking,

bedding, burning, and fertilizing); prescribed burning; fireline construction and maintenance; control of cull hardwoods; insect control (black turpentine beetle, Ips bark beetles, and southern pine beetles); disease control (fusiform rust); seed orchard, superior tree, and genetic outplantings; sawtimber, pulpwood, fuelwood, charcoal, fence post, and pine straw production; forest economics and taxation; row and leave-tree thinning; pollution abatement and tree erosion control; special feature plants management; cultural resource management; recreation/timber coordination by harvesting modifications and timber stand improvement modifications; wildlife habitat management, food plot construction and maintenance, and featuring whitetail deer, quail, and waterfowl.

## NORTH CAROLINA, Continued

For more information contact: Claude A. Hood, Rt. #2, Box 942, Elizabethtown, North Carolina 28337, phone (919) 588-4964.

### CLEMMONS STATE FOREST

Clemmons State Forest is located in Johnston County, 2-1/2 miles north of Clayton off old U. S. Highway 70. It features a Forest Demonstration Trail and other forest management practices of interest to nonindustrial private landowners, non-forestry professionals, and forestry school students.

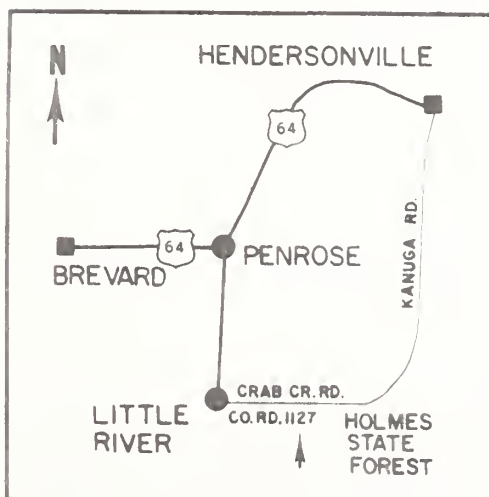

Facilities: visitor information center, restrooms, drinking water, brochures, signs, selfguided tour, interpretive displays, organized tours with guide personnel, classroom facilities, movies, slide/tape program, and gravel roads.

Demonstrations: loblolly, longleaf, white, and shortleaf pine management; upland and bottomland hardwood management; clearcutting with hand planting; seed tree method; shelterwood method; timber

stand improvement (release and precommercial thinning); site preparation (chopping and fertilizing); prescribed burning; control of understory hardwoods; insect control (black turpentine beetle and Ips bark beetles); sawtimber, pulpwood, Christmas tree, and fuelwood production; logging road layout and design; special feature area management; special feature plants management (endangered species); recreation/timber coordination through stand shaping, harvesting modifications, site preparation modifications and timber stand improvement modifications; trail construction and maintenance; wildlife habitat management through harvesting modifications, food plot construction and maintenance, and featuring whitetail deer, quail, grey squirrel, waterfowl, and songbirds.

For more information contact: Joe C. Hogue, P. O. Box 27687, Raleigh, North Carolina 27611, phone (919) 733-2162.

### HOLMES STATE FOREST

Holmes State Forest is located in Henderson County on Crab Creek Road (County Road #1127), 1.7 miles east of the Transylvania County line. It features a Demonstration Forest Trail and other forest management demonstrations of interest to private nonindustrial landowners, non-forestry professionals, and forestry school students.

Facilities: visitor information center, restrooms, drinking water, brochures, signs, self-guided tour, interpretive exhibits, organized tours with guide personnel, classroom facilities, movies, slide/tape program, and gravel roads.

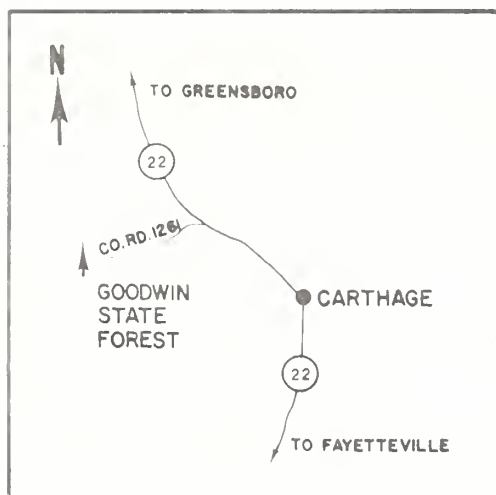

Demonstrations: loblolly and white pine management; upland and bottomland hardwood management; clearcutting with hand planting; natural regeneration by block clearcutting; timber stand improvement by release and precommercial thinning;

## NORTH CAROLINA, Continued

control of understory hardwoods; disease control (annosus root rot); genetic outplantings; sawtimber, pulpwood, naval stores, and Christmas tree production; logging road layout and design; special feature area management; special feature plants management (endangered species), cultural resource management; recreation/timber coordination through harvesting modifications, site preparation modifications, and timber stand improvement modifications; trail construction and maintenance; wildlife habitat management through harvesting modifications, food plot construction and maintenance, and featuring whitetail deer, quail, grey squirrel, waterfowl, and songbirds.

For more information contact: Joe C. Hogue, P. O. Box 27687, Raleigh, North Carolina 27611, phone (919) 733-2162.

### JAMES GOODWIN DEMONSTRATION FOREST

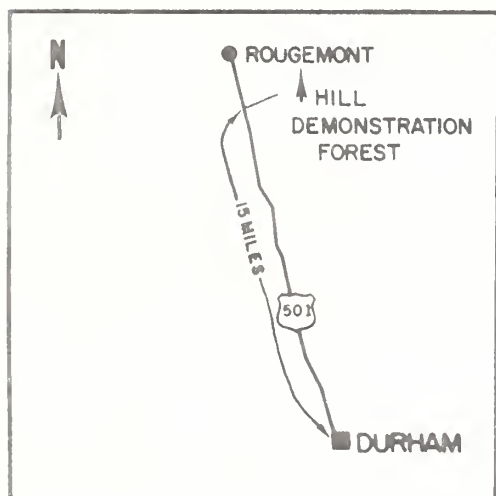

The James Goodwin Forest is located in Moore County 2 miles west of Carthage off State Highway 22 and on County Road #1261. Administered by North Carolina State University, it features forest management demonstrations of primary interest to private non-industrial landowners and forestry school students.

Facilities: signs, organized tour with guide personnel, and gravel roads.

Demonstrations: loblolly pine management; clear-cutting and hand planting; natural regeneration by block clearcutting; seed tree method; site preparation by chopping, shearing, and fertilizing; prescribed burning for fuel reduction, seedbed preparation, hardwood control, and site preparation; sawtimber, pulpwood, poles and piling production.

For more information contact: Larry G. Jervis, NCSU School of Forest Resources, Box 5488, Raleigh, North Carolina 27650, phone (919) 737-2892.

### HILL DEMONSTRATION FOREST

The Hill Demonstration Forest is located in Durham County, 15 miles north of Durham on U. S. Highway 501. It is administered by North Carolina State University, and features forest management demonstrations of primary interest to nonindustrial private landowners, forestry school students, foresters, and other natural resource managers.

Facilities: visitor information center, restrooms, drinking water, signs, organized tours with guide personnel, classroom facilities, gravel roads.

Demonstrations: loblolly, Virginia, and white pine management; upland and bottomland hardwood management; hand planting; natural regeneration by block clearcutting and seed-in-place; direct seeding; seed tree method; shelterwood method;

timber stand improvement by release and precommercial thinning; site preparation by chopping and cultivation; prescribed burning for fuel reduction, seedbed preparation,

forage and browse production, and site preparation; fireline construction and maintenance; control of understory hardwoods; seed orchard and genetic outplantings; sawtimber, pulpwood, and Christmas tree production; strip and leave-tree thinning; recreation/timber coordination through harvesting modifications; trail construction and maintenance; wildlife habitat management featuring whitetail deer and songbirds.

For more information contact: Larry G. Jervis, NCSU School of Forest Resources, Box 5488, Raleigh, North Carolina 27650, phone (919) 737-2892.

### TUTTLE STATE FOREST

Tuttle State Forest is located in Caldwell County approximately 12 miles from Lenoir, off State Highway 18 on County Road 1331. Tuttle features a Forest Demonstration Trail and other forest management demonstrations of interest to nonindustrial private landowners, non-forestry professionals, and forestry school students.

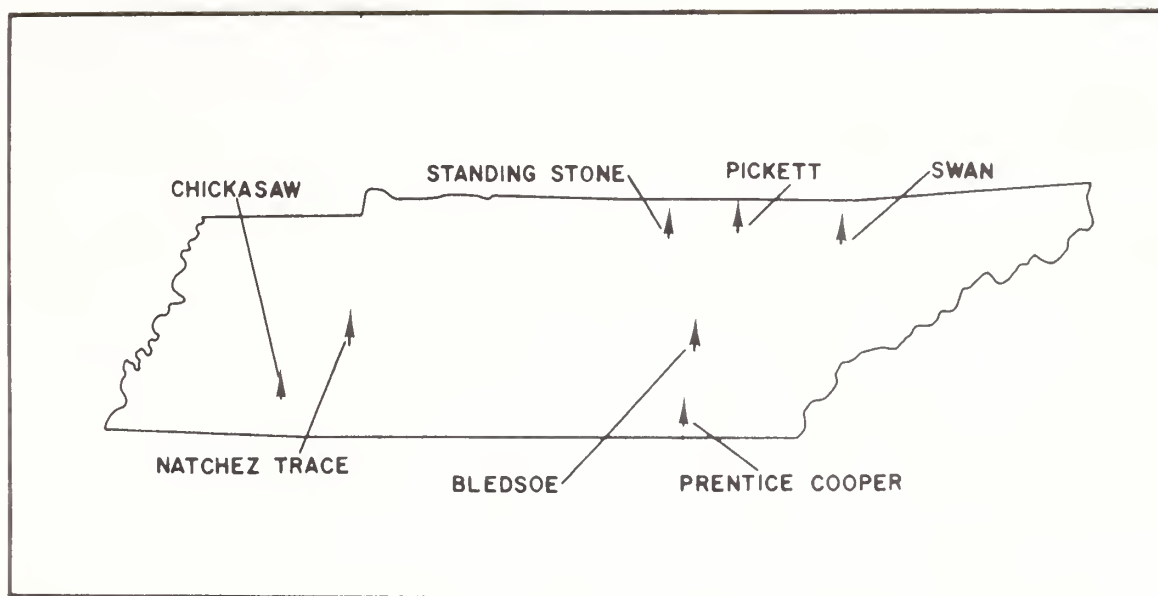

Facilities: visitor information center, restrooms, drinking water, brochures, signs, self-guided tour, interpretive exhibits, organized tours with guide personnel, classroom facilities, movies, slide/tape programs, and gravel roads.

Demonstrations: loblolly, white, and Virginia pine management; upland and bottomland hardwood management; clearcutting with hand planting; natural regeneration

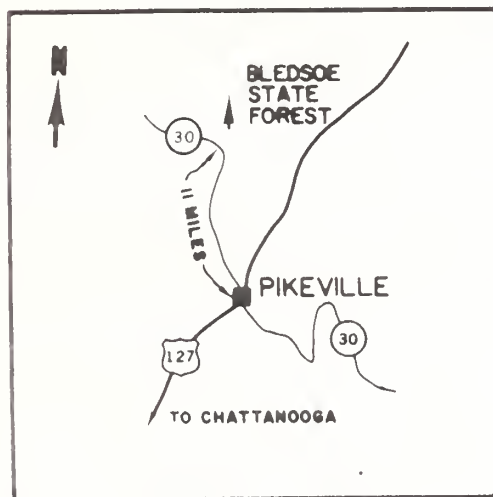

by block clearcutting; seed tree method; control of understory hardwoods; insect control (black turpentine beetle and Ips bark beetle); sawtimber and Christmas tree production; logging road layout and design; special feature area management; special feature plant management; cultural resource management; recreation/timber management through harvesting modifications, site preparation modifications, and timber stand improvement modifications; trail construction and maintenance; wildlife habitat management through harvesting modifications, food plot construction and maintenance, and featuring white-tail deer, quail, grey squirrel, and songbirds.

For more information contact: Joe C. Hogue, P. O. Box 27687, Raleigh, North Carolina 27611, phone (919) 733-2162.

## TENNESSEE

### BLEDSOE STATE FOREST

Bledsoe State Forest is located in Bledsoe County, 11 miles west of Pikeville on State Highway 30. It is administered by the Tennessee Division of Forestry and is open to the public.

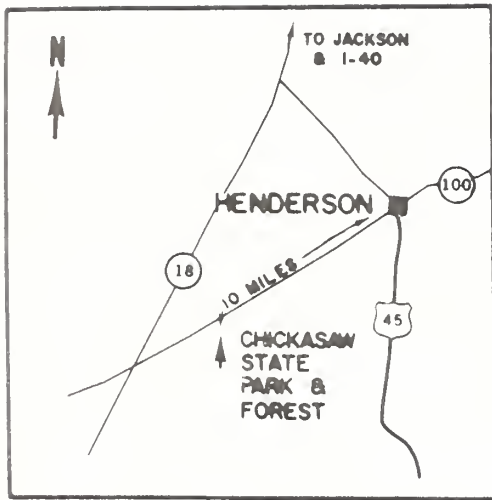

Facilities: brochures, interpretive signs, drinking water, organized tours with guide personnel, paved and gravel roads.

Demonstrations: Loblolly, shortleaf, Virginia and white pine management; upland hardwood management, machine planting; block clearcutting; timber stand improvement (release); site preparation (windrowing and disking); Pales weevil control; littleleaf disease control; genetic outplantings; sawtimber, pulpwood and fuelwood management; leave-tree thinning; erosion control; wildlife habitat

management using timber stand modifications and featuring whitetail deer, gray squirrel and songbirds.

For more information contact: Robert Campbell, District Forester, P. O. Box 160, Hixson, Tennessee 37342; phone (615) 877-4012.

CHICKASAW STATE FOREST

Chickasaw State Forest is located in Chester and Hardeman Counties, 10 miles west of Henderson on State Highway 100. It is administered by the State of Tennessee, and open to the public.

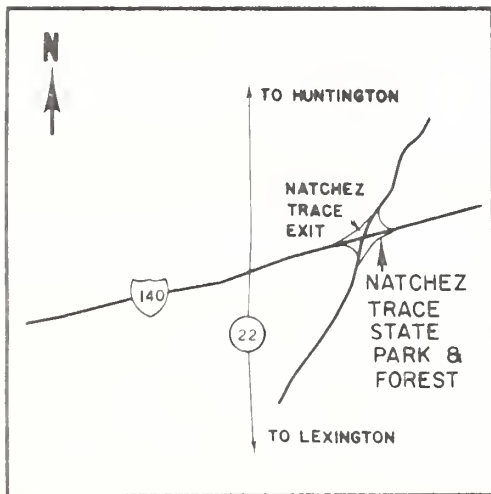

Facilities: restrooms, drinking water, brochures, signs, organized tours with guide personnel, paved and gravel roads.

Demonstrations: loblolly and shortleaf pine management; upland hardwood management; clearcutting with hand planting; natural regeneration by block clearcutting; site preparation (windrowing and and lopping); prescribed burning for forage and browse production; genetic outplantings; sawtimber, pulpwood and fuel wood production; erosion control; logging road layout and design; wildlife habitat

management featuring whitetail deer, turkey, grey squirrel, songbirds; beaver control; and bottomland drainage.

For more information contact: Wade McMahan, District Forester, P. O. Box 438, Lexington, Tennessee 38351, phone (901) 968-6676.

NATCHEZ TRACE STATE FOREST

Natchez Trace State Forest is located in Carroll, Benton, and Henderson Counties at the Natchez Trace exit on Interstate 40, about 34 miles east of Jackson. It is administered by the Tennessee Division of Forestry, and open to the public.

Facilities: visitor information center, restrooms, drinking water, brochures, signs, organized tour with guide personnel, classroom facilities, slide/tape program, paved and gravel roads.

Demonstrations: loblolly pine management; upland hardwood management; clearcutting with hand planting; natural regeneration by block clearcutting; site preparation by lopping; prescribed burning for forage and browse production; kudzu control; genetic outplanting; sawtimber, pulpwood, and

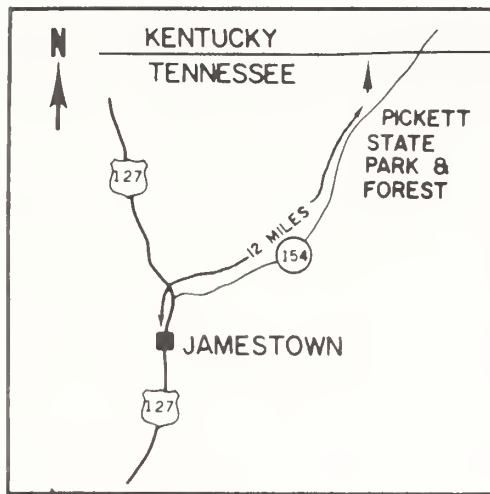

fuelwood production; leave-tree thinning; erosion control; wildlife habitat management featuring whitetail deer, turkey, grey squirrel, and songbirds; beaver control and bottomland drainage.

For more information contact: Wade McMahan, District Forester, P. O. Box 438, Lexington, Tennessee 38351.

### PICKETT STATE FOREST

Pickett State Forest is located in Pickett County 12 miles north of Jamestown on State Highway 154. It is administered by the Tennessee Division of Forestry, and open to the public.

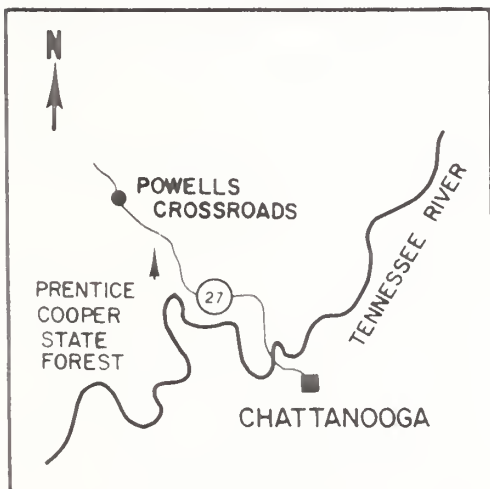

Facilities: restrooms, drinking water, brochures, signs, organized tours with guide personnel, paved and gravel roads.

Demonstrations: loblolly, shortleaf, white, and Virginia pine management; upland hardwood management; clearcutting with machine and hand planting; natural regeneration by block clearcutting; site preparation by windrowing, disking, and lopping; genetic outplanting; sawtimber, pulpwood, and fuelwood production; leave-tree thinning; erosion control; logging road layout and design; and

wildlife habitat management featuring white-tail deer, grouse, and songbirds.

For more information contact: Paul Ensminger, District Forester, 312-E First Street, Cookerville, Tennessee 38501, phone (615) 526-9502.

### PRENTICE COOPER STATE FOREST

Prentice Cooper State Forest is located in Marion County, 10 miles north of Chattanooga on State Highway 27. It is administered by the Tennessee Division of Forestry, and open to the public.

Facilities: visitor information center, restrooms, drinking water, brochures, signs, organized tours with guide personnel, and gravel roads.

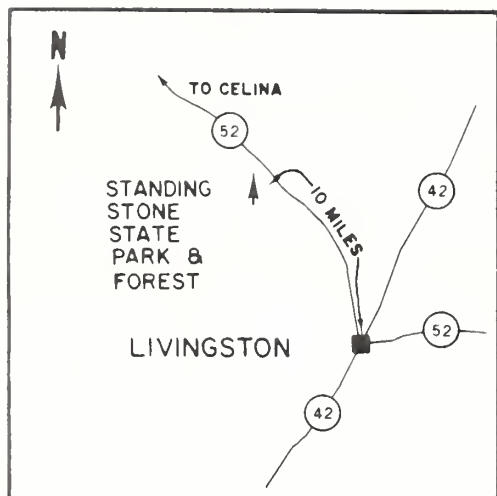

Demonstrations: loblolly, shortleaf, white, and Virginia pine management; upland hardwood management; clearcutting with machine and hand planting; natural regeneration by block clearcutting; site preparation by windrowing and lopping; insect control (southern pine beetle); genetic outplantings; sawtimber, pulpwood, and fuel wood production; erosion control; and wildlife habitat management

featuring whitetail deer and songbirds.

For more information contact: Robert Campbell, District Forester, P. O. Box 160, Hixson, Tennessee 37343, phone (615) 877-4012.

## TENNESSEE, Continued

### STANDING STONE STATE FOREST

Standing Stone State Forest is located in Overton County on State Highway 52, 10 miles northwest of Livingston. It is administered by the Tennessee Division of Forestry, and open to the public.

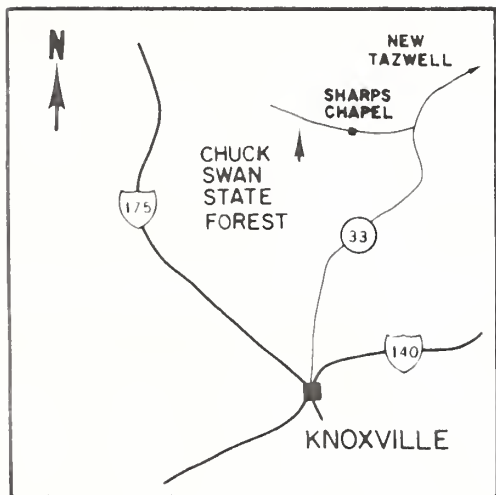

Facilities: restrooms, drinking water, brochures, signs, organized tours with guide personnel, paved and gravel roads.

Demonstrations: loblolly pine management; upland hardwood management, clearcutting with hand planting; natural regeneration by block clearcutting; precommercial thinning; site preparation by lopping; prescribed burning for forage and browse production; genetic outplantings; sawtimber, pulpwood and fuelwood production; erosion control; logging road layout and design; wildlife habitat management through

timber harvesting modifications, and featuring whitetail deer, grey squirrel, and songbirds.

For more information contact: Paul Ensminger, District Forester, 312-E, First Street, Cookerville, Tennessee 38501, phone (615) 526-9502.

### CHUCK SWAN STATE FOREST

Chuck Swan State Forest is located in Union County, 10 miles west of State Highway 33 at the Union-Claiborne County line, between Maynardville and Tazewell. It is administered by the Tennessee Division of Forestry, and open to the public.

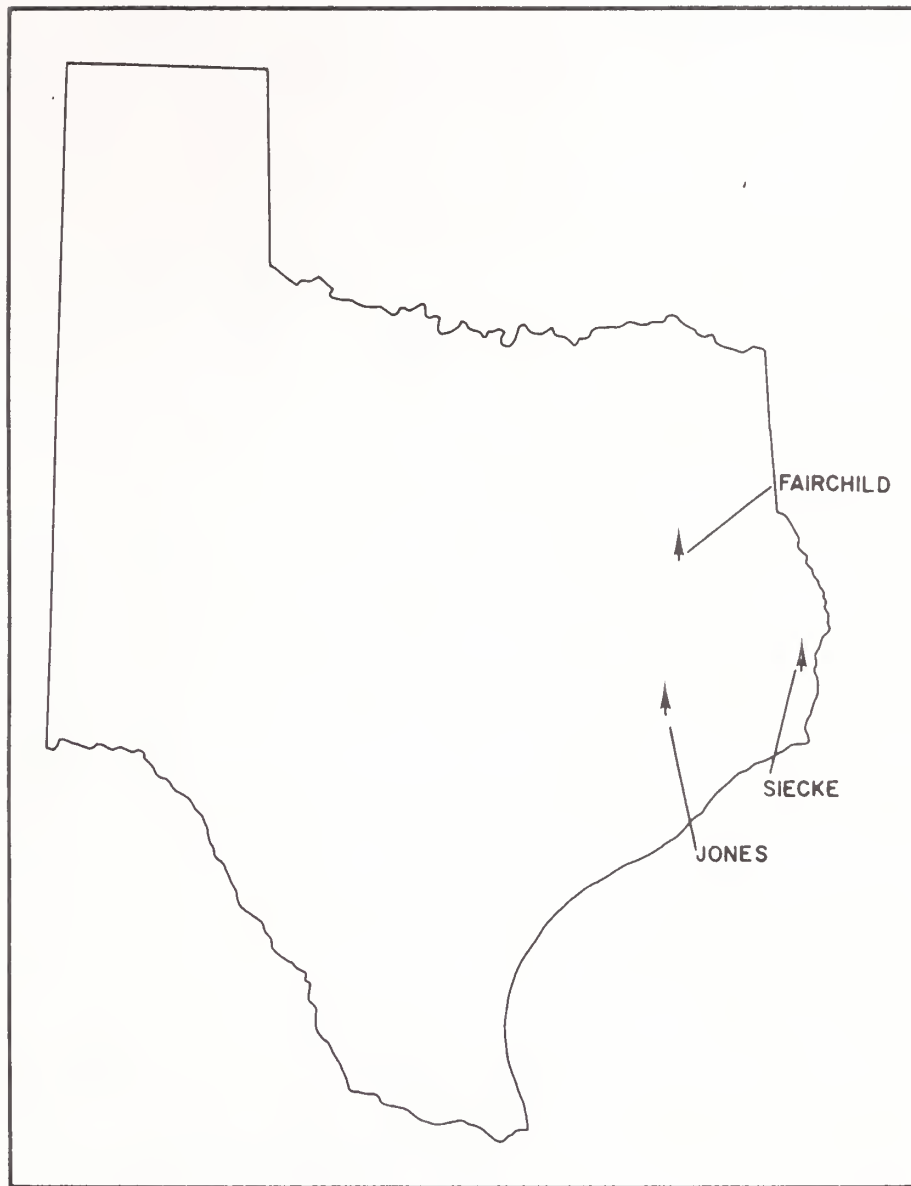

Facilities: restrooms, drinking water, brochures, signs, organized tours with guide personnel, and gravel roads.

Demonstrations: loblolly, white, shortleaf, and Virginia pine management; upland hardwood management; clearcutting with machine and hand planting; natural regeneration by block clearcutting; site preparation by windrowing, disking and lopping; prescribed burning for forage and browse production; genetic outplantings; sawtimber, pulpwood,

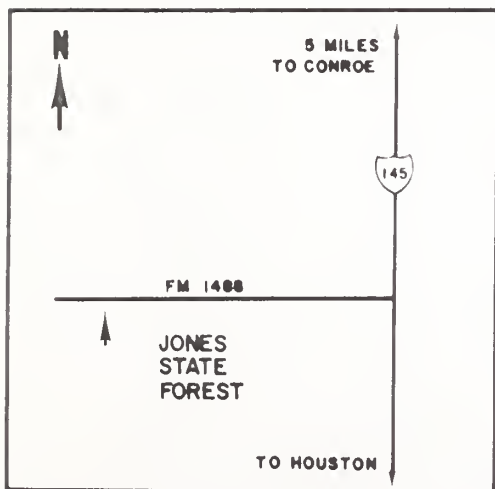

and fuelwood production; erosion control; special feature area management; and wildlife habitat management through harvesting modifications, food plot construction and maintenance, and featuring whitetail deer, turkey, grey squirrel, and songbirds.

For more information contact: Ted Dailey, District Forester, P. O. Box 2666, Knoxville, Tennessee 37901, phone (615) 525-6119.

# TEXAS

## W. G. JONES STATE FOREST

Jones State Forest is located in Montgomery County, 6 miles south of Conroe and 1 mile west of Interstate 45 on FM Road 1489. It is administered by the Texas Forest Service, and is open to the public.

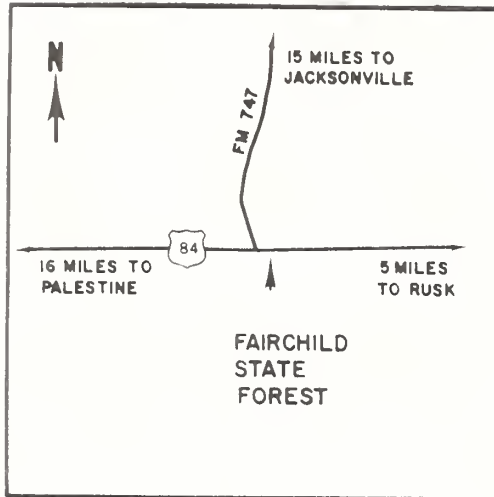

Facilities: visitor information center, restrooms, drinking water, brochures, signs, self-guided tour, and gravel roads.

Demonstrations: loblolly and slash pine management; bottomland hardwood management; clearcutting with hand planting; seed tree method; timber stand improvement (release); prescribed burning; fireline construction and maintenance; insect control (southern pine beetle); sawtimber and pulpwood production; wildlife habitat management through site preparation and harvesting modifications, and featuring whitetail

deer and red-cockaded woodpeckers.

For more information contact: David Skove, Texas Forest Service, College Station, Texas 77843, phone (713) 845-2641.

#### I. D. FAIRCHILD STATE FOREST

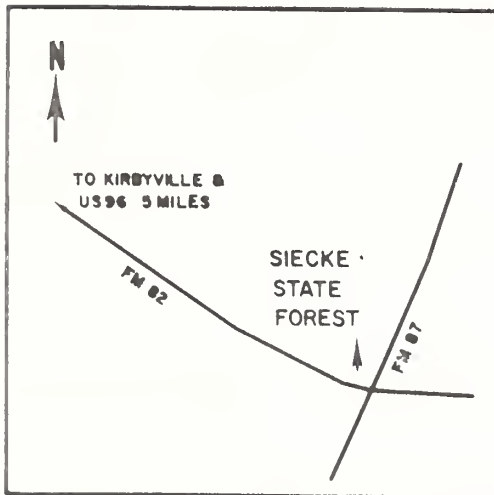

Fairchild State Forest is located in Cherokee County, 5 miles west of Rusk on U. S. 84. It is administered by the Texas Forest Service, and is open to the public.

Facilities: brochures, signs, self-guided tour, gravel roads.

Demonstrations: loblolly and shortleaf pine management; clearcutting with hand planting; seed tree method; site preparation (chopping); prescribed burning; insect control (southern pine beetle); seed orchard; sawtimber and pulpwood production; trail construction and maintenance; wildlife habitat management through site preparation and harvesting modifications, and featuring whitetail deer and red-cockaded woodpeckers.

For more information contact: David Skove, Texas Forest Service, College Station, Texas 77843, phone (713) 845-2641.

#### E. O. SIECKE STATE FOREST

Siecke State Forest is located in Newton County, 5 miles southeast of Kirbyville on FM Road 82. It is administered by the Texas Forest Service, and is open to the public.

Facilities: visitor information center, restrooms, drinking water, brochures, signs, self-guided tour, and gravel roads.

Demonstrations: loblolly, longleaf, and slash pine management; clearcutting with machine and hand planting; seed tree method; timber stand improvement (release); precommercial thinning; site preparation (chopping and shearing); prescribed burning; fireline construction and maintenance; insect control (southern pine beetle); seed orchard; sawtimber and pulpwood production; row thinning; wildlife habitat management

through site preparation and harvesting modifications, and featuring whitetail deer and red-cockaded woodpeckers; basal area thinning studies; planting spacing studies.

For more information contact: David Skove, Texas Forest Service, College Station, Texas 77843, phone (713) 845-2641.
